Ask Murine Eye Remedy Co., Chicago.

LOUISIANA BEGINS MINING ON THE 300 FOOT LEVEL AT TYBO

The Louisiana Consolidated Mining company has begun mining on the 300-foot level of the old mine at Tybo which had been under water for the past eight years. The present company found considerable difficulty in reaching the level owing to the enormous stretch of drifts and later work from which it was necessary to pull the water but that feat was accomplished Monday and operations resumed under conditions that promise to place the mine on a steady shipping basis before the end of the month.

Manager Ott Heiser found he had a ready-made mine in hand as soon as he began exploring the drowned out level. The east drift looks particularly good as there is a large body of ore waiting to be stoped at a distance of 250 feet east of the shaft. The first demand is to clean up the workings and place the ground in safe condition but the sides and roofs were found in a remarkable state of preservation with slight caving and only some rotten timber to be removed before ore will begin coming from the 300 level. Samples from this section were brought in by Manager Heiser but the returns have not yet been received. The company has a fleet of five trucks in commission and the overhead will be cut materially by the fact that the trucks will load both ways, carrying supplies to the mine and bringing back ore. Manager Heiser does not care to predict anything about tonnage but it is said that the company will send at least 50 tons weekly at the start. When the cleaning up process is completed and the mine thoroughly sampled the management expects to be in a position to outline the probable production.

The pumps are working splendidly and have no trouble in holding the water below the 300 level. That is all that is required at present as the company will utilize its power for other purposes merely working the pumps long enough to keep the water in check at a safe depth from the working forces.

DRAFT EXAMINERS FINISH FIRST LIST

LAST OF THE EXAMINATIONS ON THE FIRST CALL COMPLETED AND ADJOURNMENT TAKEN

The Nye county exemption board examined the last man on the first call late yesterday afternoon and then adjourned until next Wednesday morning when another 150 conscripts will be summoned. At the rate of the first examination it would appear that even a third call would be necessary as the number of aliens objecting to service is much larger than expected. The number examined was 104. The acceptances are running at the rate of four to one. This morning a young man who had seen service in the navy came in from Reno where he had thrown up a job in order to take his examination. He was much disgusted to find that the trip was not necessary. The names of those examined after the Bonanza went to press yesterday are:

Grigo Meggiugorac,
Daniel Radan,
Tony Salak,
Charles Spears,
Nick Melanovich,
Peter Ranson,
George Shields,
George H. Wilkings.

GOLD CIRCLE MILL ROBBED OF GOLD

"The days of old, the days of gold and the days of forty-nine," have returned to the peaceful camp of Midas in the Gold Circle mining district. Some nefarious individual or individuals have set the days of the old Overland trail vividly before the owners of the big Elko Prince mill at any rate. Friday the discovery was made that the amalgam plates in the mill were being systematically pilfered; although it has been suspected for some time by the owners that some employee of the mill had been cleaning the plates almost nightly for the past ten days, delay in appealing to the officers was voluntarily occasioned in the hope that by means of a strict watch the culprit or culprits might be caught but whoever has been doing the job with the goods in their possession, "knew his business," for no clue to the identity of the thief has yet been found. District Attorney Carville and Sheriff Harris left for the scene Saturday morning at five o'clock and will remain in Midas until the mystery is solved. While no authentic information could be gleaned beyond the fact that the gold plates in the mill had been robbed, still an estimate gives the amount already lost by the mill at approximately \$5,000. No names of suspects have yet been divulged by the officers, but it is believed that evidence pointing to the guilt of certain prominent persons in Midas is strong.—Elko Independent.

The man with the hoe and garden is getting revenge on the food monopolists these days as he gathers delicious peas, beets, lettuce and potatoes.—Tacoma Ledger.

Maybe you also have met the kind of man who thinks he's a high-brow after he has taken a highball. —Galveston News.

TELEPHONE OFFICIAL IS CALLED TO WASHINGTON
(By Associated Press.)
SAN FRANCISCO, Aug. 8.—Scott Hendricks, president of the Oregon, Nevada Telephone Co., has accepted an important legal and executive position under Hoover. He goes to Washington tomorrow.

When the Russian regiments resolve themselves into debating societies German arms triumph.—Tacoma Ledger.

Along with the baconless breakfast we might call a few ice cream coneless afternoons.—Spokane Review.

NORTH STAR SENDS OUT A SHIPMENT

The North Star sent out this week a carload of ore to the West End mill. This car is credited to the month of July owing to the fact that the ore was ready for shipment but the West End mill was too crowded to accept it. This makes 100 tons for the month and Manager Lowe expects to do even better this month as the mine is showing decided improvement in every way. The drift on the hanging wall side of the North Star fault is looking better with a foot of excellent ore which holds well as the drift advances. The raise from the 1059 stope on the vein holed through last week to the 1050 level and demonstrated a good width of pay ore all the way.

Dressing Wounds With Sugar.

Dr. G. Magnus reports to the Theraeutische Monatshefte of Berlin on his success in treating wounds with ordinary sugar. This he sprinkles in a thick layer over a wound that has previously been washed and dried. He covers it with a dry dressing, which he renews every day.

The Journal of the American Medical Association says a great advantage of this dressing is that it does not stick to the wound, but stimulates a powerful secretion, which flushes out the depths of the wound, while profuse suppuration softens crusts and necrotic tissue and gives a chance for healthy granulation below. When this stage is reached salves or transplantation take the place of the sugar.

Naval Gunfire.

In the Napoleonic era the ships opened fire with guns at ranges of about 800 yards. The ships of today open fire at 22,000 yards range, and gunfire begins to be very effective at 18,000 yards. The torpedo as fired from surface vessels is effective up to 10,000 yards range, and this requires that a ship shall keep beyond this distance to fight her guns, says a British naval authority.

AMUSEMENTS

BUTLER THEATER

The accomplished screen favorites Thomas Meighan and Anita King in a comedy drama "The Heir to the Hoorah." A story of three young men that discover a mine and become very wealthy and not having any relatives decide that one must get married so as to include an heir to their wealth. The youngest of the three being chosen as the one to be married and the other two start to locate the wife for the young partner. Finally a young lady is discovered and the younger partner refuses to marry, but at any rate, the other two later enslave him into the marriage. Everything runs smooth until the mother-in-law steps in and she does not care much for the husband's looks, but greatly pleased about his money. The son-in-law finally decides to go back to the mine. Few years later he reads of the arrival of a baby and he with the other partners return to wife as the baby is to be the heir to the riches of all and through the baby everything is again joined together and a happy family live ever after. Also Pathe Weekly with all the late doings in France as well as in the U. S. A. Tomorrow Valetta Suratt in "The Slave," dealing with the problems of today. Also "Biff Ding Bang," a Fox comedy. An error was made in the program relative to "The Mystery of the Double Cross" next Sunday, which will be the 15th and last episode of the mystery story.

IRON OF THE FUTURE.

No Danger of a Shortage Because of Increased Consumption.

That iron is the very basis of our industrial civilization will be admitted by the thoughtful, and many of our greatest supplies of iron ore are being rapidly depleted because of the increased per capita consumption of iron in the world over, an increase which is destined to be greater in the future when the races in Asia and Africa increase their consumption of iron.

These conditions of increasing consumption and decreasing reserves have often in the past, particularly about the beginning of this century, been used to create a scare, on the ground that our supplies of usable ore were being so rapidly depleted that their exhaustion would occur within two or three generations.

This is a preposterous point of view, because as we lower the percentage of iron in the rock which we call "ore," the quantity of such ore increases at a rate out of all proportion to the decrease in iron content, and as we use leaner and leaner ore technical improvements will be made which will minimize any tendency to increased cost of production.

The same thing has happened in gold, silver, copper and other ores, and today copper ores are being worked with only 1.5 per cent of copper in them.—Chemical Engineering.

Get your bread directly from your baker and your bill will be only a very little one. Just now we have a first-class pastry man, who can supply you with all kinds of pastries on very short notice.

ARMY OFFICER HERE

Major Yost, U. S. A., came up from the Presidio this morning on a tour of inspection. He highly approved of the work of the local recruiting officer, Corporal F. E. Koyle. At noon he went to Goldfield, the guest of Senator Kendall, in the latter's car. Major Yost was particularly pleased with the showing that Tonopah has made in the way of voluntary enlistments.

Wonderful Soda--

That's what they all say

—and why wouldn't they say it? It certainly is the most wonderful soda we have ever seen, and probably the very best soda that can be produced today. That is the reason. First, purity of ingredients, then careful manipulation, then a sanitary fountain and the cleanest and nearest service. That's what makes it
